

maritime automation ... powered by people

Rockson Automation was founded 2010 in Kiel despite the stormy times we are successful in the following areas:

yacht & cruise

yachts and cruiseliner are masterpieces of modern technology Rockson Automation system make them controlable and visible all features are needed – we show them all

you talk ... we listen... and design

Rockson offers the full range of maritime services with our service stations and partner we can do this around the world and of course we are with you for newbuildings and masters of retrofits

...and build reliable

our focus is on the maritime market, but not limited to using the company long experience and knowledge in hard- and software development customizing solutions for special demands

EVOLUTION VS

- **integrated alarm and monitoring system**
- high quality state-of-the art
- highly flexible for newbuildings and retrofits
